

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

## STATE CHARITIES AID ASSOCIATION,

6 EAST 14TH STREET, NEW YORK.

[As this catalogue is prepared chiefly for the purpose of aiding the members of the STATE CHARITIES AID ASSOCIATION in their studies, no attempt at the usual alphabetical arrangement of titles is made. The books and pamphlets are grouped in accordance with the branch of work assigned to each of the four standing committees, with such sub-divisions as seem convenient; and the order followed is, as far as possible, that of the dates of publication. A fifth division contains those books which are of interest and use to all the committees, and will therefore be consulted by all alike.]

6 East Fourteenth Street,  
New York, March 1, 1880.

In issuing the accompanying catalogue of the Library of the STATE CHARITIES AID ASSOCIATION, comprising in all nearly one thousand volumes and pamphlets, it is proper to state that it is a catalogue of donations only, the Association not having any fund, as yet, for the purchase of books. The collection of very interesting reports concerning volunteer relief work during the Franco-German war was a personal gift from the Empress of Germany. Mr. Danby P. Frye, of the Local Government Board of London, generously gave us a full set of reports of the Poor-law Board, from 1834 to the present time ; and other friends and authors in England have sent valuable and rare books and pamphlets, sometimes giving the last copy from their own shelves. Friends in New York and the officers of public boards in this and other states have also occasionally remembered us with gifts.

But for standard authorities in some of the branches of our work our student members must have recourse, at present, to public and special libraries. Those into whose hands this catalogue may come, and who are interested in the objects at which the Association aims, are therefore urgently asked not only to aid us by donations of books or reports relating to our work, but especially to furnish the librarian with the titles of any valuable books which they may own themselves, and which they would be willing *to loan*, under suitable restrictions, to members of the Association. Exchanges with other Societies are also solicited.

For the Association,
